

# Oil-MAX

*Cooking Oil Filtration*

# Oil-Max...

- ✓ **Increases Profits**
- ✓ **Improves Quality of Food**
- ✓ **Restores Oil**
- ✓ **Eco-Friendly**

## Actual Test Results

# Increase Profits

*Filtering cooking oil is the easiest way to cut costs, improve food quality, and increase profits.*

Cut cost of cooking oil by over \$4,000/year!

# Improve Quality

*The Oil-Max System improves the flavor and appearance of fried foods.*

By removing char buildup from the oil and leaving out the unpleasant looks and taste of aged particulate matter, you can ensure your customers will receive the *best golden-fried food time after time.*

The Oil-Max System also improves fried food quality by extending your "*Optimum Frying Period*". This is the phase of the oil where the products being fried looks and taste best, allowing for a better overall product, giving you a *competitive edge* over your competition that will *keep your tables full and your time focused.*

# Our System

The Oil-Max System is designed to work in two processes. These two processes are carried out by our **Sparklaid®** and our **Oil-Max Filters**.

When used concurrently these two processes can **improve the quality** of your food, **reduce** unwanted aromas, **remove** char, **lighten** the color of your oil and *extend the life of your oil.*

Unlike other systems that are chemically engineered synthetics, **Sparklaid®** is a **completely organic** solution that is *safe and effective.*

Sparklaid® has found acceptance in all aspects of the hospitality industry, from food-service and Quick Service Restaurants to convenient stores and hotels. The Oil-Max System is engineered to work with the Sparklaid® to *ensure the most efficient micro-filtration possible.* Available in 4 sizes and compatible with all traditional fryers.
